

PRIMARY CAPABILITIES

Power Platform Custom Solution Architecture, Development, Implementation and Maintenance

Business Process Mapping, Automation, and Integration

M365 Training including business apps, SharePoint and Power Platform.

ISO 9001, 20000-1 and 27001 Consulting and Implementation. (In addition to Multiple NIST Standards and CMMC Consulting)

We are here to **grow** your business.

Sebenick Consulting LLC serves small to medium size businesses, looking to scale their organizations.

We work across business processes, as a **force multiplier**, working with your entire team to ensure solutions are created **with** them and **for** them, to save time, money and frustration.

Our goal is to help you achieve success and the level of independence you desire, not to force you into a lifelong maintenance partnership.

We serve your team, so that they can serve your customers...**better.**
